

Your student has a study partner

A caregiver's guide to Kami Companion, a browser extension that supports learning across the web.

Every AI-powered feature is designed to help your student access and understand content — not to do their work for them.

Explore Companion's tools and how they support your student's learning.

Read aloud

Reads any selected text on the screen out loud.

Dictionary

Looks up the definition of any word on the page instantly.

Picture dictionary

Shows a visual image representing a word's definition.

Translate

Translates selected text into another language.

Explain

Breaks down the context and meaning of text and images.

Summarize

Condenses a longer passage into the main points.

Adjust

Lets students change the reading level of the text on the page.

Predictive text

Word suggestions as students type in any text field on the web.

Voice typing

Lets students speak instead of typing with their keyboard.

Reading assist

Allows students to track where they are on the page.

Immersive Reader

Opens website text in a clean, distraction-free reading view.

Toolbar controls

Selection mode

Activates selection options so students can highlight a word or passage.

Open in Kami

Sends the current web page into Kami, where students can use interactive editing tools.

Toolbar settings

Lets students change the size of the toolbar, and select light or dark mode.

Safe AI. Secure Data. Total Peace of Mind.
